

Offshore Wind for North Carolina is a coalition of organizations working together to ensure that North Carolina is positioned as a national leader for responsibly sited and operated offshore wind. The coalition advocates for policies and regulations necessary to achieve a just, equitable, and environmentally responsible adoption of North Carolina's offshore wind energy targets of 2.8GW by 2030 and 8.0GW by 2040.

GOALS

Establish a market for offshore wind in North Carolina that maximizes economic opportunity and progress towards state and federal clean energy goals

Protect wildlife and enhance regulatory certainty by ensuring that offshore wind is developed in an environmentally responsible manner

Allow and expand future offshore wind development off North Carolina's coast
